

Industrial Price Index. Methodological Note

Coinciding with the publication of the Industrial Price Index of the Basque Country for January 2011, Eustat has implemented a change in the Classification of Economic Activities (CNAE) used to prepare the index. Thus, the CNAE-93 classification has been replaced by the [CNAE-2009](#).

This change is based on Regulation 1893/2006/EV of the European Parliament and the Council, of 20 December 2006, establishing the statistical classification of economic activities - NACE Revision 2. Royal Decree 4775/2007, of 13 April 2007, therefore approved the Spanish National Classification of Economic Activities (CNAE 2009), which has been progressively incorporated into all the economic indexes prepared by Eustat.

In the specific case of the Industrial Price Indexes, the most important changes resulting from the incorporation of the Regulations and the new CNAE-2009 affect the activities of Repair and Installation of Machinery and Equipment, which have become part of Manufacture of Furniture; Other Manufacturing and Repair of Machinery and Equipment, and Publishing, which is no longer part of Industry and is now included under the Services Sector. Special mention should likewise be made of Water Supply & Purification and Waste & Decontamination Management, which are no longer needed in the price economic indexes even though they are part of the Industrial sector in the new classification.
